ABSTRACT:

Deodar is a well-known, tall and evergreen tree found in the Himalayan region and at other parts with a high altitude in India. It bears brown seeds within a cone shaped structure. Its durable and strong timber wood is used to make houses, doors, furniture, houseboats etc. The plant also contains essential oils, which can be used for various clinical purposes like rheumatoid arthritis, headaches etc. The oil also works as an anti-fungal.

Keyword: Devdaru, Himalayan cedar, Cedrus deodara

INTRODUCTION

Herbal medicines are considered as a rich source of medicines which can be used in drug development and synthesis. These herbal medicines play an important role in the development of human culture around the whole world. Herbal medicines have been proved better and even best against allopathic medicines. the present review presents Cedrus deodara have many qualities and features including anti-inflammatory, antitumor, anti-bacterial, antifungal and various other and possesses great influence on nervous system.

Devadar Plant Description:

Devadar plant grows up to be a large coniferous evergreen tree which bears
flowers, new leaves and fruits all year through and has a sweet fragrance surrounding it like a divine aura. Leaves are long and needle-like (usually 2.5-5cms long) and shoot is long, single tough with a few dense clusters of short shoots emerging from it.

**Cultivation:**

Found at an altitude of 1200-3000 meters above sea level, Seeds are shed in the winter season and flowers bloom by September and October. Drained soil and high moisture are ideal for its growth. It needs ample space and sunlight to reach its grand growth potential. It’s extremely adaptable for growth in varied pH of soils.
